THE RUG DEPARTMENT

at rear
of first
floor is a
pleasant
place.

You
can see
most any
sort of Rug or Car-
pet you may have in mind.

Whether you want American designs or Oriental patterns, they are here at a quality we guarantee and at a lower price than is generally charged.

A neat Rug in brown or unusual tan, or green or red will brighten your den or living room or dining room and make it cheerful.

Tapestry Rugs, Body Brussels, Velvets, Axminsters, Wiltons; 27 in. by 54 in., 36 in. by 63 in., 6 ft. by 9; 8.3 ft. by 10.6, 9 ft. by 12—any size for any room. Prices \$1.25 up to \$50.

Carpets are here in a large variety of patterns and colorings. A carpet is absolutely necessary on some floors and you want a carpet that is neat, attractive and full of "wear." We sell that kind.

Ingrains, Body Brussels, Velvets, Tapestry—35c to \$1.75 per yard.

Linoleums are better than carpets in the kitchen, and a good Linoleum will last a long time.

Linoleum is made of oil and cork, and on the proper mixing of these ingredients, depends the life of the flooring. You can buy so-called linoleums for almost nothing. That kind is made merely by covering indifferent coarse cloth with a sort of paint which looks pretty when you put it upon the floor.

We guarantee the linoleum we sell and we should like to tell you more about the structure of it, which makes it more valuable than its price.

KNOX URGES RECIPROCITY

(Continued from first page.)

the market afforded by the United States to Canada," and for "the legitimate expansion of our manufacturing industries" was given during the recent negotiations, added Mr. Knox, in explaining the reductions on all classes of agricultural implements, the free admission of cottonseed oil into Canada, the exemption from duty of all fruits and vegetables and other agricultural products, of which some sections have a surplus at certain seasons. The benefits are generally distributed in Mr. Knox's opinion, and "no permanent injury to any producing class is apprehended."

Speaking of the provision for free wheat, Mr. Knox pointed out that the transportation facilities of the United States for handling the surplus Canadian crop must be taken into account, thus preventing "the demoralization of prices which results through the dumping of larger quantities upon the European markets, where the world's supply is fixed." He declared that the free ad-

mission of grain from Canada would meet the present situation and place the control in the hands of the American grain growers.

"The principal complaints against the measure," continued Mr. Knox, "come from the politicians who have been endeavoring to persuade the farmer that his interest in the protective tariff is based on the tariffs on agricultural products, rather than upon the general prosperity of the country, or they are heard from some local special interest."

"It is significant how little is said about who gets the best of the bargain. The general observation is one of gratification that the arrangement is beneficial to both countries. The breadth and usefulness of the agreement has surprised and gladdened the friends of good relations between the countries and disconcerted those upon both sides of the line who expected a horse trader's bargain."

"A generous measure of reciprocity between Canada and the United States is but a natural expression of their interdependence. Efforts to restrain, hamper and interfere with its realization will be as futile and unprofitable as were the early ruinous trade wars between the states."

"The reasons for reciprocity are very real and striking and ought to lift the consideration of the result of the recent negotiations to a high plane and large-

minded comprehension of the greater reasons and motives of human and national relations and rise above the mere balancing of trade advantages."

Quincy's Plans.

Mr. J. S. Swingle, the well-known granite manufacturer of Quincy, Mass., has been agitating in the local papers for the construction of municipal docks in order to permit water shipment for Quincy granite. Mr. Swingle raises the point that many of Quincy's competing granite centers have no outlet for their product save by railroad. Quincy, on the contrary, could reach Boston, New York, Brooklyn, Philadelphia, Baltimore, Washington and other large granite consuming centers by water. And yet the city makes no attempt to take advantage of its natural facilities. Mr. Swingle is an enterprising and progressive business man and he naturally chafes under the apathy he finds in the trade. Quincy granite is one of the best stones of its class and is well adapted for building work. From time to time there is talk in Quincy of turning to the building field in addition to the quarrying of monumental stock. There is no reason why an excellent market should not be developed in this line, but it will be essential to provide for water transportation first.—From "Stone."
